10 Cool Spy Gadgets

SLIDE TITLE: **9. StarChase**

Pretty much any gadget with lasers is the ultimate in spy gear, which is why we like the new vehicular technology from [StarChase](#). To help prevent dangerous police chases, StarChase developed a system that is capable of aiming a laser at the back of a vehicle and firing a projectile that contains a GPS receiver, wireless transmitter, and battery. This, in turn, tracks a vehicle's whereabouts. The data is then delivered via secure Internet connection to a dispatch center. There are more than 100,000 high-speed pursuits in the U.S. every year [according to the company](#), but StarChase is hoping to reduce that with this safer and more effective way to catch criminals.
